

POWER BI SALES ANALYTICS DASHBOARD

Project Documentation

1. Project Overview

The Power BI Sales Analytics Dashboard is an interactive business intelligence report designed to monitor sales performance and identify major business trends. It combines key performance indicators, monthly trends, category analysis, regional performance, channel contribution, sales-person performance, product performance, and management insights in one report.

2. Business Objectives

- Monitor total sales, total profit, orders, customers, average order value, and profit margin.
- Compare current performance with the previous year (LY) where available.
- Identify monthly sales and profit trends.
- Understand which product categories and sales channels contribute most to revenue.
- Compare sales performance across countries/regions.
- Track individual sales-person performance using sales, orders, profit, and margin.
- Identify high-performing products and their profitability.
- Present concise insights for management decision-making.

3. Dashboard KPI Summary

KPI	Current Value	vs Last Year / Comparison
Total Sales	\$55.9M	\$47.3M +18.15%
Total Profit	\$5.5M	\$4.2M +31.90%
Total Orders	348,125	300,458 +15.87%
Total Customers	18,765	16,238 +15.58%
Average Order Value	\$160.55	\$157.35 +2.03%
Profit Margin	9.83%	8.88% +0.95 pp

4. Dashboard Visuals

- Total Sales & Total Profit by Month** — A combined column and line chart showing monthly sales and profit. It helps identify seasonality, peak months, and periods where profit changes relative to sales.
- Sales by Category** — A donut chart showing category contribution to total sales. Consumer Goods is shown as the largest category at 32.5%, followed by Food & Beverages at 24.5%.
- Sales by Region** — A horizontal bar chart comparing country/region sales. The dashboard shows the USA at \$20.9M, followed by the UK at \$10.2M and Canada at \$7.4M.
- Sales by Channel** — A donut chart showing revenue contribution from Online, Retail Store, Distributor, and Other channels. Online contributes \$30.2M (54.0%) in the dashboard.
- Sales Distribution by Country** — A country-level distribution view showing the relative contribution of USA, UK, Canada, Australia, India, and Others.
- Top 6 Sales Persons** — A table comparing sales persons by Total Sales, Total Orders, Total Profit, and Profit Margin %.
- Top 10 Products** — A product performance table showing Total Sales, Total Profit, and Profit Margin %. It can be used to identify products with strong revenue and profitability.
- Key Insights** — A management summary area that highlights the main findings from the dashboard.

5. Key Findings from the Dashboard

- Total sales are shown at \$55.9M, with an 18.15% increase versus the displayed last-year value of \$47.3M.
- Total profit is shown at \$5.5M, with a 31.90% increase versus \$4.2M.
- The dashboard reports 348,125 orders and 18,765 customers.
- Average Order Value is \$160.55, compared with \$157.35 in the displayed last-year comparison.
- Profit margin is 9.83%, compared with 8.88% in the displayed last-year comparison.
- Consumer Goods is the largest sales category at \$18.2M (32.5%).
- Online is the largest displayed sales channel at \$30.2M (54.0%).
- The USA has the highest displayed regional sales value at \$20.9M.
- Aarav Sharma is displayed with \$8.7M total sales, 52,340 orders, \$0.58M profit, and 6.67% profit margin.
- Chocolate Wafer Pack is displayed with \$3.4M sales, \$1.02M profit, and a 30.00% profit margin.

6. Data Model & Recommended Data Structure

For a production Power BI implementation, the report can use a star-schema structure. A central Sales fact table can store transaction-level measures, while dimension tables provide descriptive attributes.

Table	Typical Columns
Fact Sales	Order ID, Date Key, Product Key, Customer Key, Salesperson Key, Channel Key, Region Key, Quantity, Sales Amount, C
Dim Date	Date, Month, Month Number, Quarter, Year, Calendar Month
Dim Product	Product ID, Product Name, Category, Subcategory
Dim Customer	Customer ID, Customer Name, Country/Region
Dim Salesperson	Salesperson ID, Salesperson Name, Team/Region
Dim Channel	Channel ID, Channel Name
Dim Region	Region/Country, Territory

7. Important DAX Measures

Total Sales: Total Sales = SUM(Sales[Sales Amount])

Total Profit: Total Profit = SUM(Sales[Profit])

Total Orders: Total Orders = DISTINCTCOUNT(Sales[Order ID])

Total Customers: Total Customers = DISTINCTCOUNT(Sales[Customer ID])

Average Order Value: Average Order Value = DIVIDE([Total Sales], [Total Orders])

Profit Margin %: Profit Margin % = DIVIDE([Total Profit], [Total Sales])

Sales LY: Sales LY = CALCULATE([Total Sales], SAMEPERIODLASTYEAR('Dim Date'[Date]))

Sales Growth %: Sales Growth % = DIVIDE([Total Sales] - [Sales LY], [Sales LY])

Profit LY: Profit LY = CALCULATE([Total Profit], SAMEPERIODLASTYEAR('Dim Date'[Date]))

8. Power BI Skills Demonstrated

- Data import and transformation using Power Query.
- Data modeling and relationships.
- Date-table design and time-intelligence analysis.
- DAX measures and KPI calculations.
- Cards/KPI visuals, column charts, line charts, donut charts, bar charts, and tables.
- Conditional formatting for performance indicators.
- Interactive filtering and report navigation.
- Dashboard layout, visual hierarchy, and business storytelling.

9. Resume Project Description

Power BI Sales Analytics Dashboard — Developed an interactive sales analytics dashboard in Power BI to analyze \$55.9M in sales, \$5.5M in profit, 348K+ orders, and 18K+ customers. Created KPI cards, time-series analysis, category/channel/region breakdowns, sales-person and product performance tables, and DAX measures for sales, profit, margin, AOV, and year-over-year analysis.

10. Conclusion

This dashboard provides a consolidated view of sales and profitability performance. It is suitable as a portfolio project for demonstrating practical Power BI skills, particularly data modeling, DAX, visualization, KPI reporting, and business-oriented analysis. The figures and findings in this documentation are based on the dashboard image supplied for this project.
